

RECOMBINANT PRODUCTION OF NOVEL POLYKETIDES

Abstract of the Disclosure

5            Novel polyketides and novel methods of  
efficiently producing both new and known polyketides,  
using recombinant technology, are disclosed. In  
particular, a novel host-vector system is described which  
is used to produce polyketide synthases which in turn  
10          catalyze the production of a variety of polyketides.
